What Crestron can provide:

- Control systems
- Audio and video distribution
- Lighting control
- Collaborative technologies
- GUI design software
- Wireless presentation systems
- Motorised shades
- Home security systems
- Speakers
- Dynamic control surfaces

Crestron residential solutions

Crestron OS 3

User experience is at the core of OS 3, the latest operating system for Crestron Home. OS 3's premier hardware combined with its sleek and stylish interface and the ability to control multiple properties remotely, ensures that homeowners are always in control. OS 3 is completely customisable; homeowners are able to identify their favourite rooms

Crestron CP4-R

The CP4-R is a secure, high performance control processor and interface for use with Crestron Home OS 3. The processor is able to control home automation including lighting, HVAC and shading, home cinemas, multiple video ports and multi-dwelling applications. The processor is equipped with a 4-series multicore CPU processor handling the demands of an advanced home automation system at remarkable speed.

Crestron commercial & education solutions

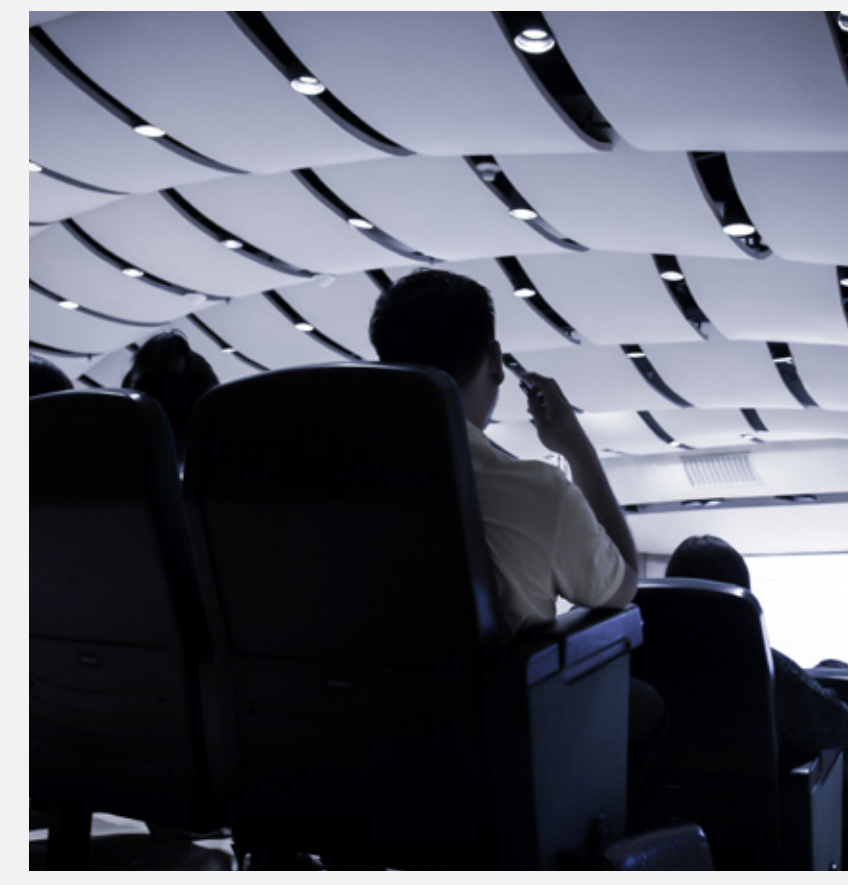

Crestron NVX

DigitalMedia NVX is a highly scalable solution that provides 4K60, 4:4:4, HDR on the network. Crestron's 1GB solution works with any application, any network and any design. DM NVX routes all information through one secure unit and is the only solution with Pixel Perfect Processing.

Crestron Flex

Crestron Flex is the latest unified communications (UC) offering from Crestron, providing a simple and reliable user experience no matter where you are in the world. Crestron Flex is equipped with native support for some of the most popular third-party UC applications including Microsoft Teams, Skype for Business and Zoom.

Crestron Flex P-Series

The Crestron Flex P-Series is Crestron's first over-IP desk phone. Integrating seamlessly with infrastructures the Crestron Flex P-Series is a bring unified collaboration to individual work

CASE STUDY

Grand Prix Villa

“The technical solution they have deployed is highly integrated and we are very grateful to Henri for accepting this challenge. It is a truly remarkable project and brings us total delight every day.”

[Download PDF Case Study](#)

THE OWNER OF THE GRAND PRIX VILLA

The Challenge

The owner of this extensive residence spanning over 3000sqm across five levels, had clear objectives for their vast connected home project. Every electronic system was to be part of the automation and needed to be discreetly integrated into the fabric of the interior, while the technological architecture had to be cutting edge, scalable and easy to use.

Our Solution

Paris-based integrators Henri selected a Crestron DigitalMedia solution to centralise the management and distribution of multiple AV sources. Crestron custom controls including stylish touch screens, remote controls and wall-mounted tablets provide a user-friendly platform to adjust settings from anywhere in the villa.

This spectacular villa boasts highly advanced technology integration of a scale rarely seen in residential properties. Henri became involved in this four year project at the very start, ensuring that every area of the house could be seamlessly automated without compromising the conceptual design of the building's interior.

The owner had high expectations and wanted to push integration to its maximum, incorporating the very best technologies in every area of this huge wow-factor home. Set out across five levels, with a living room, dining room and kitchen on the ground floor, bedrooms on the first, and offices with a meeting space on the second floor, the villa also includes a 'real living' area within the basement with a swimming pool, sauna, hammam spa, gym, a dressing room, wine cellar, private cinema and a garage. The villa also houses its own car museum, a keen area of interest for the homeowner.

Henri selected a Crestron DigitalMedia solution to provide the high performance distribution of HD AV sources to multiple rooms. The powerful integrated DM-MD32X32 switcher delivers ultra-reliable and ultra-high bandwidth signal routing for numerous AV outputs via one simple, centralised device. The DM system allows the distribution of 23 sources including TV decoders, Apple TV, Blu-Ray players, HDMI connectors on eight TV's and two mirror TV's. It is also capable of displaying multiple sources on a single screen simultaneously via a Crestron DVPHD processor, and provides UHD 4K 60Hz video scaling through a Crestron HDCP2.2 HDMI input card.
